

Interstellar Ventures

Friday, 27 November 2015

Hello, World!

Interstellar Ventures is a software engineering bureau offering distinguished services in the field of *software development*. Looking to hire one or more software engineers? Contact service@inters.co (<mailto:service@inters.co>) to receive an offer.

Left to Right: Ioanna Dimitriou (<http://boolesrings.org/ioanna>), set theorist turned software engineer. *Max Rottenkolber* (<http://mr.gy>), knee deep in software and all its facets.

Open Source R&D

We invest heavily in open source research and development. Below is an overview of open source software systems developed by Interstellar.

- *Geneva* (<https://github.com/inters/geneva/>) the portable document preparation system

Client Testimonials

“Interstellar was instrumental in helping us successfully meet a difficult technical challenge on a tight schedule. They understood our strict code quality requirements and delivered an excellent product accompanied by thorough tests.”
—Michael Roberts, *Xstructure* (<http://xstructure.com>)
