

Interstellar Ventures

Tuesday, 6 February 2018

Hello, World!

Interstellar Ventures is a software development consultancy offering services for all things related to software. Looking to hire one or more software engineers? Contact service@inters.co (<mailto:service@inters.co>) to receive an offer.

Left to Right: Ioanna Dimitriou (<http://boolesrings.org/ioanna>), set theorist turned software engineer. *Max Rottenkolber* (<http://mr.gy>), knee deep in software and all its facets. *Timo Buhrmester* (<http://penenen.de>), soldering iron wielding hacker.

Open Source R&D

We invest heavily in open source research and development. Below is an incomplete list open source software developed by Interstellar.

- *Vita* (<https://github.com/inters/vita>), high-performance IPsec VPN gateway
- *Choiceless Grapher* (<http://cgraph.inters.co>), diagram creator for consequences of the axiom of choice (AC)
